

Made In France

Préface

Depuis 1996, VOLX CLIMBING conçoit et fabrique des prises d'escalade en France dans le nord-ouest de la région lyonnaise.

Pour VOLX CLIMBING, le "Made in France" est synonyme de :

- **Qualité**
- **Innovation**
- **Proximité**
- **Développement durable**

Aujourd'hui nous proposons des milliers de modèles, en suivant au plus près les attentes des grimpeurs, aussi bien en termes de préhension que de design. La nature, le rocher, le mouvement et la compétition sont nos inspirations premières.

Tous les membres VOLX CLIMBING travaillent ensemble pour vous offrir les formes et les innovations qui vous permettront de concrétiser vos projets.

Introduction

Since 1996 Volx Climbing has been designing and manufacturing climbing holds in France in the region northwest of Lyon.

For Volx Climbing, "Made in France" is synonymous with:

- **Innovation**
- **Responsiveness**
- **Quality**
- **Sustainable development**

Today we offer thousands of models, adapting to the expectations of climbers and routesetters, both in terms of grip and design. Nature, rocks, movement and competition are our primary inspirations.

All VOLX CLIMBING team members work together to offer you the shapes and innovations that will allow you to make your projects a reality.

Développement durable

Chez VOLX CLIMBING, nous sommes engagés depuis toujours dans une démarche de respect de l'environnement. Des études poussées sur l'analyse de l'ensemble du cycle de vie de nos prises nous permettent de mettre en place des actions concrètes permettant de limiter et contrôler notre impact environnemental.

Nos actions :

- Favoriser les partenariats de proximité
- Produire près de nos clients et optimiser notre logistique pour réduire les coûts logistiques superflus et réduire les émissions de CO₂
- Sélectionner des résines moins agressives pour l'environnement
- Supprimer les composants dangereux de notre production
- Mesurer et minimiser les rebus de production
- Recycler les déchets et instaurer le tri sélectif
- Privilégier des matières d'emballage recyclables

Sustainable Development

At VOLX CLIMBING, we have always been committed to an approach of respect for the environment. Extensive studies on the analysis of the entire life cycle of our holds allow us to put in place concrete actions to limit and control our environmental impact.

Our actions:

- Favor local suppliers
- Produce close to our customers and optimize our logistics to reduce unnecessary costs and reduce CO₂ emissions
- Select resins that are less harsh on the environment
- Remove dangerous components from our production
- Measure and minimize production waste
- Recycle waste and introduce selective sorting
- Favor recyclable packaging materials

L'innovation comme source d'inspiration et de croissance.

Fruit de plusieurs mois de recherche, VOLX CLIMBING a mis au point « ECO-MATERIALS ». Avec plus de 20% de matière recyclée, cette nouvelle formulation des prises en polyester (PE) conserve les mêmes propriétés que les mortiers de résines traditionnels tout en limitant son impact environnemental.

➤ Éco-responsable

- En favorisant des fournisseurs de proximité et une production locale, VOLX CLIMBING s'engage à réduire son empreinte carbone et les coûts logistiques superflus
- ECO-MATERIALS utilise des composants 35% plus respectueux pour l'Homme
- En résultent, des prises d'escalade durables avec une très grande résistance à l'abrasion

➤ Écologique

- ECO-MATERIALS intègre plus de 20% de matière recyclée dans sa composition
- Il permet d'économiser 25% d'énergies fossiles et de réduire de 20% l'émission de gaz à effet de serre

➤ Économique

- Parce qu'écologie et économie ne sont pas incompatibles, VOLX CLIMBIUNG s'engage à appliquer le même tarif que les prises PE traditionnelles, soit un rapport qualité/prix inégalable

Innovation as a source of inspiration and growth.

The fruit of several months of research, VOLX CLIMBING has developed "ECO-MATERIALS". With more than 20% recycled material, this new formulation of polyester (PE) holds retains the same properties as traditional resin mortars while limiting its environmental impact.

➤ Éco-responsible

- By promoting local suppliers and local production, VOLX CLIMBING is committed to reducing its carbon footprint and unnecessary logistics costs
- The result is durable climbing holds with very high resistance to abrasion

➤ Environmentally Friendly

- ECO-MATERIALS incorporates more than 20% of recycled material into the composition of the holds
- This saves 25% of fossil fuels and reduces greenhouse gas emissions by 20%

➤ Cost-efficient

- Because sustainability and economy should not be incompatible, VOLX CLIMBING offers these eco-friendly holds at the same price as traditional PE holds, i.e., an unrivaled quality / price ratio

Shaping SHAPE OF YOU

Le "SHAPING" est la phase d'imagination et de création de toutes les nouvelles prises d'escalade.

Dans le lexique de l'escalade, ce terme équivaut à l'étape de « sculpture » des prises.

Fort de son expérience d'ancien sportif de haut niveau et d'une longue carrière d'ouvreur de parcours d'escalade, Stéphane DUGIT ne cesse de créer de nouvelles prises et formes pour VOLX CLIMBING. La préhension elle-même, le geste technique, le mouvement pur, sont autant d'inspirations qui alimentent constamment son désir de création.

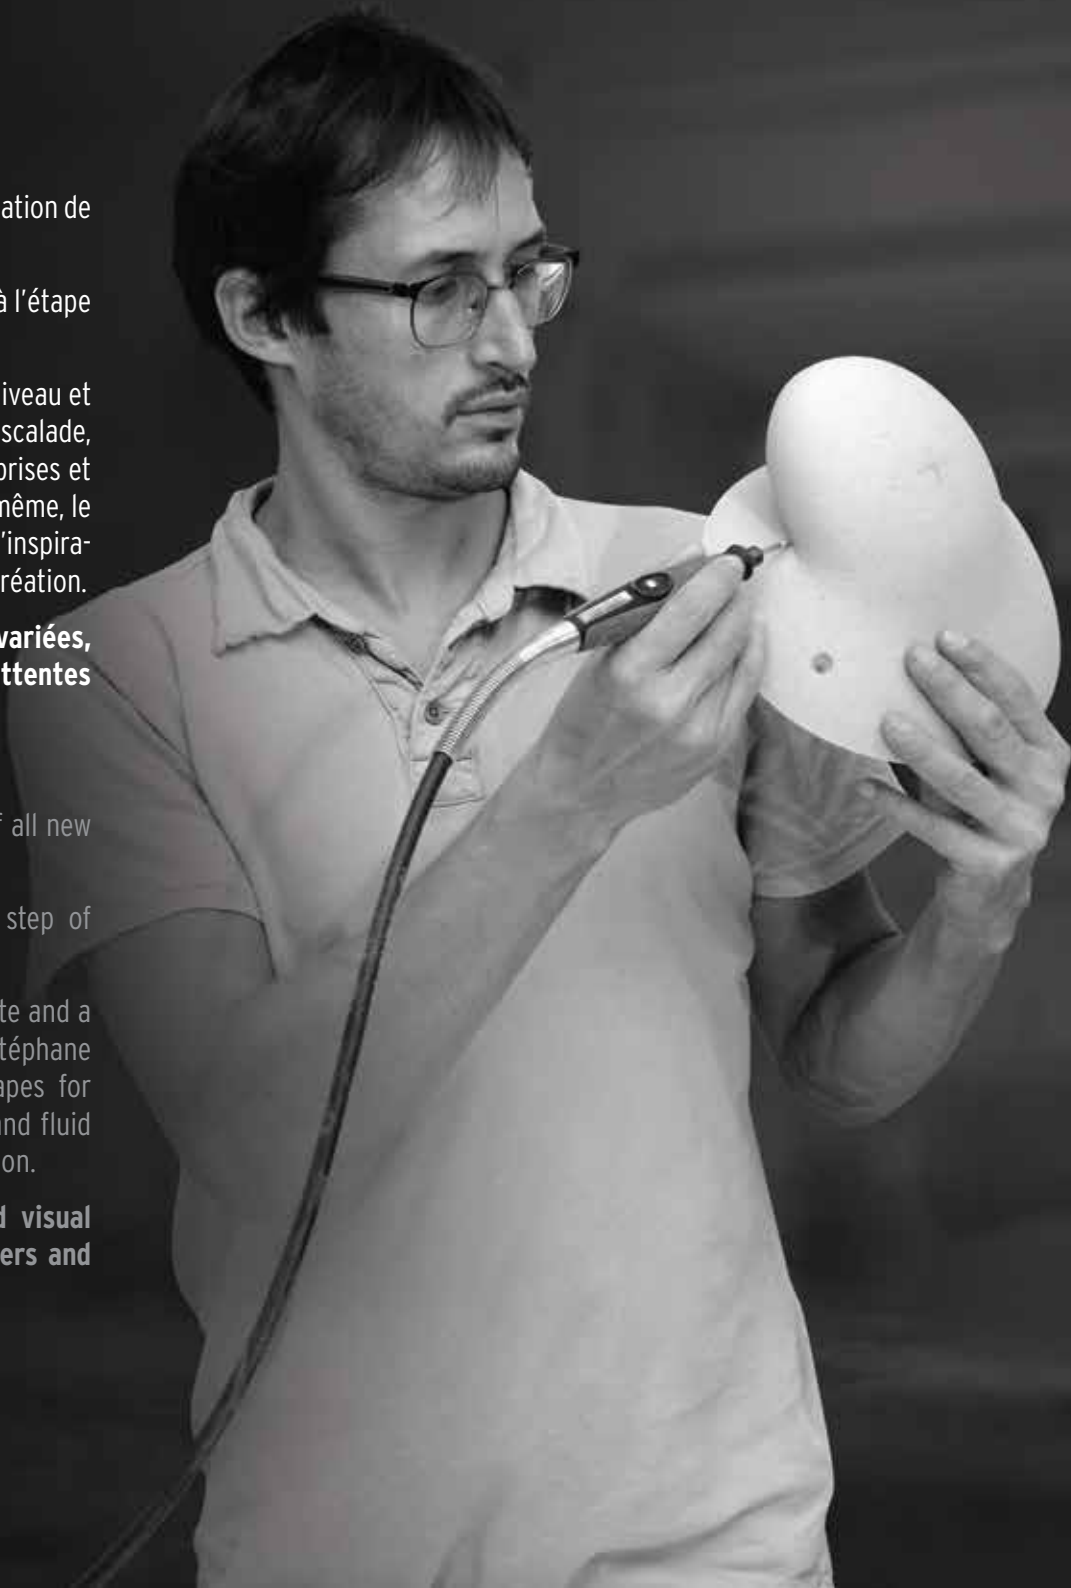

En résultent des préhensions techniques, variées, graphiques et visuelles pour répondre aux attentes des ouvriers et des grimpeurs.

Shaping is the conception and creation phase of all new climbing holds.

In climbing jargon, this term equates to the step of "sculpting" the holds.

With his experience as a former high-level athlete and a long career as an international routesetter, Stéphane DUGIT continues to create new holds and shapes for VOLX CLIMBING. The grip itself, the technique, and fluid movements, constantly feed his desire for creation.

The result is technical, varied, graphic and visual holds to meet the expectations of routesetters and climbers.

Les prises d'escalade

VOLX CLIMBING fabrique ses prises d'escalade soit en polyuréthane (PU) soit en polyester (PE) cela pour vous proposer une large gamme de prises, de formes, de préhension.

PU Le polyuréthane (PU) est utilisé sur des prises très fines ou très grosses car ses caractéristiques techniques permettent d'obtenir des produits plus légers tout en limitant les risques de casse pendant le serrage des prises.

- **Légèreté**
- **Sécurité**
- **Résistance aux chocs**
- **Couleur éclatante**

PE Notre mortier de résine polyester (PE) nous permet d'obtenir un mélange ultra homogène pour une production de prises compactes, résistantes à l'usure (friction des mains, chaussons et cordes) et au serrage.

- **Economique**
- **Résistant et durable**
- **Adhérent**

Climbing Holds

VOLX CLIMBING manufactures its climbing holds either in Polyurethane (PU) or in polyester (PE) to offer you a wide range of holds, shapes and grips.

PU Polyurethane (PU) is used on either very thin or very large grips as its technical characteristics allow for lightweight products while limiting the risk of breakage during the installation of the holds.

- **Lightweight**
- **Durable**
- **Impact resistant**
- **Bold colors**

PE Our polyester (PE) resin mortar allows us to obtain an ultra-homogeneous mixture for the production of compact holds, resistance to wear (friction of the hands, climbing shoes and ropes) and tension.

- **Cost-effective**
- **Resistant and durable**
- **Solid grip**

Packs

Les Packs VOLX CLIMBING offrent des préhensions variées et ergonomiques, adaptées à tous les niveaux, avec un rapport qualité/prix incomparable. Des pieds, des règles, des aplats, des bosses et des boules, des trous, des pinces, des mini-bacs et des vrais bacs : tout y est !

Avec nos Packs, vous allez pouvoir vous concentrer sur l'essentiel : vos ouvertures !

- 1 pack PURE Optimum Player de 50 prises mini bacs, en M
- 1 pack initiation de 50 prises, de S à XL
- 6 packs COTATION de 4A à 6B de 50 prises, de S à XX L

The VOLX CLIMBING packs offer varied and ergonomic grips, suitable for all levels, with an incomparable quality / price ratio. Footholds, crimps, slopers, balls, huecos, pinches, mini-jugs and jugs: everything is here!

With our Packs, you will be able to concentrate on the essential: your routes!

- 1 PURE Optimum Player pack of 50 mini-jugs, in M
- 1 initiation pack of 50 holds, from S to XL
- 6 GRADE packs from 4A to 6B of 50 holds, from S to XXL
