Volumes

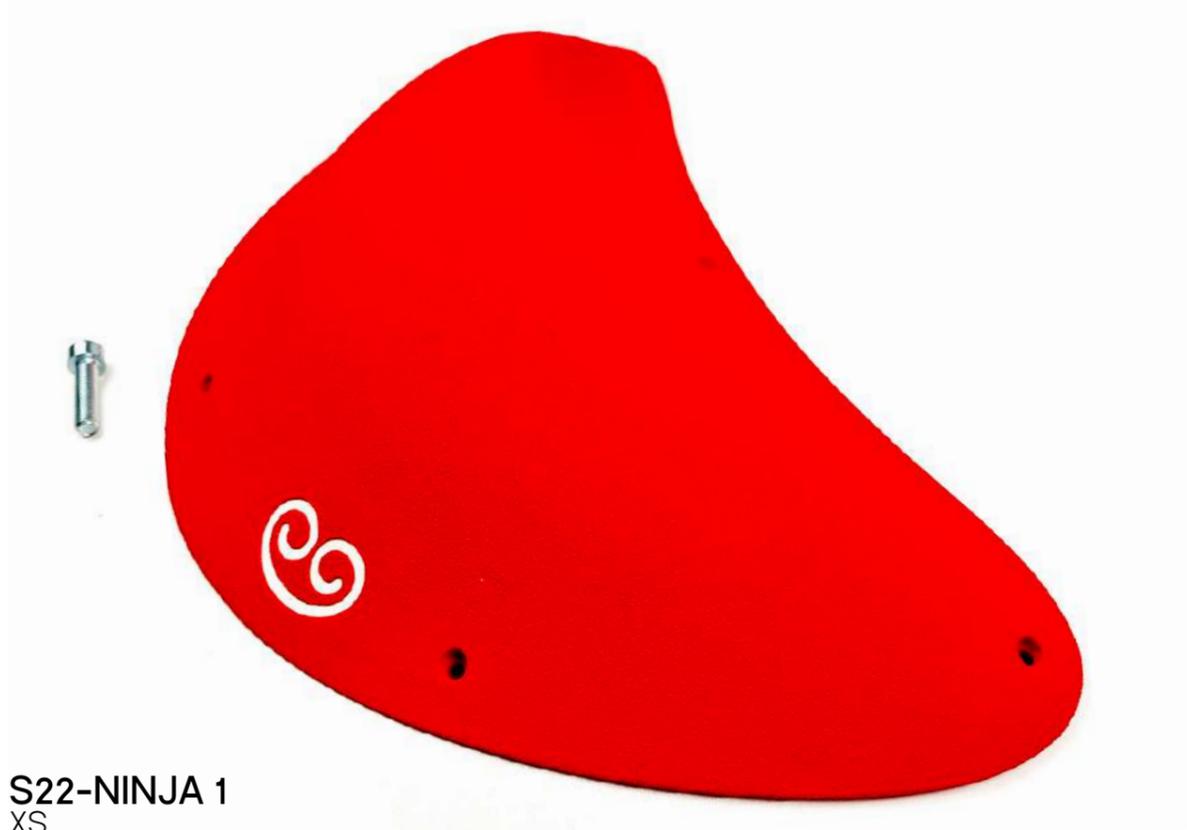

Agripp is a Belgian brand offering Fiberglass volumes from all sizes and designed to challenge climbers, from professional to beginners. They are ideal for climbers who like technical or dynamic movements.

Our positive friction technology offers **long lasting friction and durability**. Our New T21 macro range is now **«borderless»** for a unique aesthetic and easier fixation.

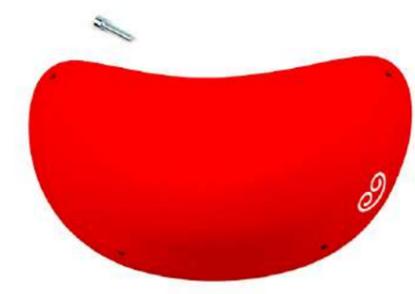

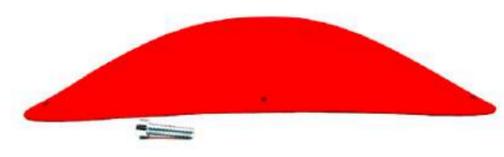

All our macros are also available in **dual texture**. The smooth part of the macros pushes the climber to be more precise.
