

HOLDS

CLIMBING HOLDS & VOLUMES CATALOGUE

TECHNICAL INFORMATION

THE MATERIALS

We use two materials for our climbing holds:

- **POLYURETHANE:** This material is both light and resistant to impact forces. We offer a different choice of colours: bright fluorescent ('fluo') ones.
- **POLYESTER:** This is the traditional resin used for climbing holds. The touch is dry and the holds are resistant to abrasion.

THE HOLDS COLOURS

We offer a vast selection of colours.

PE POLYESTER **PU** POLYURETHANE

QUALITY AND CERTIFICATIONS

EPS - EXPLOSION PROOF SYSTEM

The EPS system is a patented technology developed by ENTRE-PRISES. If a bolt-on hold should develop a crack or break across the fixing hole, the hold will remain in place connected together by the metal EPS component and the pieces will not fall. This system is implemented on all large volume PE holds.

EN 12572-3: HOLDS CERTIFICATION

All Entre-Prises holds comply with the European standard for climbing holds. Rigorous tests are randomly carried out on the sets of holds.

EN 1176-1: PLAYGROUND CERTIFICATION

Entre-Prises offers a large range of holds that are certified to comply with the European standard for playgrounds. They can be used by children older than 2 years.

MAINTENANCE

The climbing holds must be cleaned regularly. Simply wash with warm water and a stiff brush. Do not use any solvent detergent that could weaken the hold. A damaged climbing hold cannot be repaired.

 FIXINGS

Here are most of the fixing tools we can provide you and their recommended use.

To help you choose the right screws, you can refer to the “recommended screws” section that is specified in each product description. Please note that this is not exhaustive information and screw size may vary depending on the thickness of your wall.

REF.	NAME	RECOMMENDED USE

EQ684	FHC bolts M10*120	For indoor bolt-on holds
EQ890	FHC bolts M10*140	For indoor bolt-on holds
EQ891	FHC bolts M10*160	For indoor bolt-on holds
EQ892	FHC bolts M10*180	For indoor bolt-on holds
EQ006	FHC bolts M10*35 STAINLESS STEEL	For outdoor bolt-on holds
EQ005	FHC bolts M10*50 STAINLESS STEEL	For outdoor bolt-on holds
EQ007	FHC bolts M10*70 STAINLESS STEEL	For outdoor bolt-on holds
EQ012	Wood screws 5*40	Use only on wood walls for anti-rotation and screw-on holds
EQ024	Wood screws 5*70	Use only on wood walls for screw-on volumes
EQ825	FHC tamper-proof bolts M10*35 STAINLESS STEEL	For playgrounds or unguarded walls Outdoor use
EQ820	FHC tamper-proof bolts M10*50 STAINLESS STEEL	For playgrounds or unguarded walls Outdoor use

INSERTS

EQ100	Anchoring pins EAM 10*40	Use only on concrete walls Indoor use - For FHC bolts
EQ101	Anchoring pins EAM 10*40 STAINLESS STEEL	Use only on concrete walls - Outdoor use - For FHC Stainless steel bolts
EQ200	T-nut inserts M10	Use only on wood walls Indoor use For FHC bolts
EQ201 + EQ023	L-shaped bolt-in inserts M10 + wood screws 4*16	Use only on wood walls Indoor use - For FHC bolts

TOOLINGS

EQ098	Allen key M6	To be used for FHC installation
EQ889	Allen key M8	To be used for CHC installation
EQ097	Allen key M6 FACOM in T shape	To be used for FHC installation
EQ102	Expansion anchor H10	To be used for anchoring pins installation
EQ821	Allen key for tamper-proof screws	To be used for FHC tamper-proof bolts installation

**OUR
INSTALLATION
RECOMMENDATIONS**

To ensure user safety, the climbing holds require special attention during assembly:

- We recommend the use of a torque wrench set to a maximum of 35 N·M.
- The surface must be flat, unbroken and clean.
- It is essential to use the holes provided for the anti-rotation screws.

Most of our holds are equipped with a dual fixing system that allows the use of different bolts:

- CHC M10 bolts (cylindrical-type)
- FHC M10 bolts (counter-sunk-type)

**DIFFICULTY
OF THE ROUTE**

To help you in selecting holds, we offer a rating scale for each set.

This is indicative of the complexity of the hold.

**THE SIZE
OF THE HOLDS**

It depends on their average diameter:

- XS** 0 to 5 cm
- S** 5 to 8 cm
- M** 8 to 11 cm
- L** 11 to 16 cm
- XL** 16 to 22 cm
- XXL** 22 to 30 cm
- A** Mix

 **HOW TO
CHOOSE HOLDS?**

The choice of climbing holds is an important step for the life of your climbing wall.

HERE ARE A FEW TIPS:

OUTDOOR OR INDOOR USE

For outdoor use, we recommend PolyEster holds.

QUANTITY

- For bouldering: use between 5 and 15 holds for a boulder 4.5 meters high.
- For lead: use 3 to 4 holds per meter for a hard route, and 6 to 7 holds for an easy route. Also, in order not to saturate your wall, we recommend to keep up a maximum 3 routes per climbing line.

SHAUNA COXSEY

Fundamental climbing movements

I am so excited to share the latest set of holds from my range with Entre-Prises. The vision for the latest set is that a routesetter could create an entire circuit with these holds alongside the previous range which is why I was really busy in creating lots of new shapes to add onto the collection!

Continuing the principles from the previous set, these holds are designed to interconnect with each other so setters can create stoppers or improve holds by pairing them together increasing the amount of possibilities for the setter.

It was so good seeing what setters produced with the last range and I am looking forward to what they come up with using this set in 2021!

Parisian duo, Bleaujob is route setting in all its facets.
From competition to climbing gyms, we were keen to offer a range that would be accessible to as many people as possible.

The shapes are more voluminous and allow 3D climbing, something to play with from beginner to expert.

Atami (wave in Japanese), shaped under «la dent de Crolles», Rhône Alpes, offers a whole range of outstanding shapes.

Shaper for EP for more than 3 years. Simon continues to expand the Absolute range and is now developing his own range and bringing a wave of originality.

«Shape is a subtle balance between ergonomics and design. inspiration comes from the desire for a technical and comfortable grip. Simple and pure shapes, reflecting a modern climbing style. Forget the superficial, concentrate on the essential. Imagined by the mind, sculpted for reality. For free climbing, for the beauty of movement, for pleasure.»

Practice and training enable climbers to grow and develop.

For this, we offer fun, compact hangboards made with the "SoftTouch" texture, specially developed to protect your skin while training.

Campus rungs and wooden balls allow you to progress by introducing new grips and various moves. These tools allow you to work, among others, the strength of your fingers, forearms and biceps.
